-

Personal Interests

- Traveling – I love to travel and have had the opportunity to travel to multiple countries which I feel has given me a lot of real-world experience,
 - Gaming – I have enjoyed video games and board games ever since I was a child, gaming is how I connect with friends and family, I believe that gaming has given me many skills that I use in my everyday life such as problem solving, teamwork and the ability to think fast on my feet,
 - Investing – I have recently enjoyed learning about the stock and crypto markets, this has sparked an interest in current affairs and how they affect our economy.
 - Designing – I love to design mock websites and applications and learn new skills on YouTube.
